

QUICKIE®

S-636

Form, fit and function with
a Punch...
the Quickie S-636 has it all!

Nothing Beats a Quickie™

Available in two models, SC (Single Power Option) and MPC (Multiple Power Option) the Quickie S-636 features innovative performance and versatile seating and positioning options to accommodate for both general and specialized rehabilitation needs.

Designed for Performance:

- Standard 4-pole motors with 6.5 mph standard speed.
- Short wheel base for excellent maneuverability.
- Dynamic independent wheel suspension that provides a smooth ride even over obstacles.

Multi-Power Options: (Available on S-636 MPC: K0861)

- Power Recline.
- Power Recline & Tilt.
- Power Articulating Legrests.
- Power Ventilator.

Versatile Seating Options:

- TRAX System allows for adjustments along a dovetail track on seat and back .
- Power Seating Options - 53° of CG Tilt, Power Recline (MPC only).

R-net Electronics:

- Industry standard VR-2 PG Drive Joystick for non-expandable controls.
- R-net Expandable Controls with full specialty control options.
- R-net provides up to 8 different profiles for various environments.
- R-net features color screens on select joysticks and an OMNI display with a real-time consumer clock (clock display on screen).
- OMNI includes IR functions and add-on Bluetooth® Mouse Mover.
